
BPI Energy Auditor Training Program

You may increase your business by becoming a certified building analyst. This training gives you the knowledge and certification needed to help homeowners by performing an energy audit, measuring consumption and offering solutions for improved performance!

You'll learn skills that are transferrable to a variety of areas-home construction, home inspection, weatherization and more!

The following are some of the industries and professions that will benefit from the BPI Energy Auditor training and certification:

- Building Contractors
- General Construction Contractors
- Heating, Air and Ventilation Contractors
- Insulation Contractors
- Weatherization Contractors
- Weatherization Agency Personnel
- Architects/Design Engineers
- Mechanical Engineers
- Structural Engineers
- Energy Auditors (private and utility personnel)
- Home Inspectors
- Manufacturers of products that support the Housing Industry

What is BPI?

BPI (Building Performance Institute Inc.) is a leading developer of technical standards for home performance and weatherization retrofit work recognized across North America.

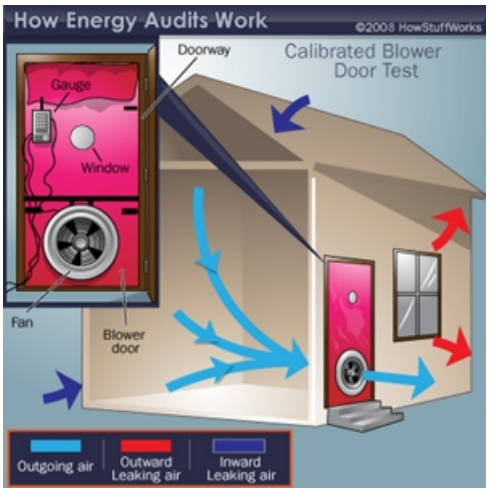
From these standards, BPI developed training programs, professional credentialing for individuals, and company accreditations-including quality assurance programs-that help raise the bar in home performance contracting.

Energy Auditor Training, Testing & Certification

The Energy Auditor Training Program is for individuals who are preparing to take the BPI Building Analyst exam.

The training program focuses on the home as a system, from HVAC to walls and windows. You'll receive in-class training as well as hands-on training. You will also learn to use a thermal imager, blower door and a duct blaster to evaluate home performance.

Energy Auditor Training consists of the following:



- Building Science
- Building Assessment Skills
- Diagnosing Air Leakage
- Heating & Cooling Systems
- The Building Shell
- Durable Health Homes
- Water Heating & Base Load
- Computerized Energy Audit Software Programs
- Thermal Imaging

Each class is set up as a combination lecture/lab and consists of classroom instruction and demonstration/hands-on training. Upon completion of this training, you will have the training needed to take the BPI Building Analyst exam.

Location/Class Schedule/Contact Information
